ABOUT ME

I'm a B.Sc. Information Technology student with a strong passion for Full-Stack Web Development, React.js, and modern JavaScript technologies. Experienced in building responsive, scalable, and user-focused web applications using React, Vite, Tailwind CSS, Bootstrap, and REST APIs. Continuously expanding my expertise in MERN Stack, Python, Data Structures & Algorithms, and Artificial Intelligence. A quick learner with strong problem-solving abilities who enjoys creating real-world software solutions and continuously improving technical skills.

EDUCATION

SWARRNIM UNIVERSITY

Bachelor in IT

2024 - 2027

RED AND WHITE

full-stack development

2024-2026

SKILLS :

- HTML5 , CSS3 , JS
- React Js
- Tailwind , Bootstrap
- C , C++
- DSA using C++
- Python

SOFT SKILLS :

- Time Management
- Adaptability
- Communications
- Emotional Intelligence

PROJECTS

interior design website - AG design Studio - React + Bootstrap 2025

Designed and developed a modern interior design business website showcasing premium furniture and home décor collections. Created responsive layouts, service pages, inquiry forms, and smooth navigation to improve user experience. Focused on elegant UI, performance, and mobile-friendly design.

CA Smart Assistant (React + Vite + Tailwind CSS) 2026

Developed a web application to streamline communication between Chartered Accountants and their clients through separate Client and CA portals. Implemented appointment booking, inquiry forms, document management, and reusable React components. Focused on responsive design, clean UI, and scalable project architecture using Context API and React Router.

Expense Tracker (React + Context API) 2026

Built a responsive expense management application for tracking income, expenses, and account balances. Implemented Context API for efficient global state management and reusable components. Included transaction history, category-wise records, and a clean, user-friendly dashboard for better financial management.

Additional Projects (React | JavaScript | REST APIs) 2025-2026

I have also created various frontend applications including YouTube Clone, Gemini AI Clone, Movie Poster Finder, Tic-Tac-Toe, Weather App, Calculator, and To-Do App. These projects enhanced my understanding of React, component-based architecture, API integration, state management, and responsive web development.
